

# StarBright<sup>®</sup>

## LIQUID II

Once again, Faultless exceeds the standard with StarBright Liquid II—a concentrated easy-to-use starch and sizing formula designed for broad usage and simple application.

StarBright Liquid II is available from your distributor in 4/1 gallon case or individual gallons, or in bulk form in 5 gallon pails, 15 or 55 gallon drums

## COST EFFECTIVE & SAFE!

- **Superior ability** to add body to a wide range of cotton and polyester blends.
- Unique and patented formula **controls build up** better than any other liquid sizing—will not “waterproof” fabrics.
- Add **stain and soil resistance** to fabrics for easier subsequent cleanings.
- Protects cotton fibers from breaking down—**increasing the life** of cottons and blends.
- Contains **optical brighteners** to enhance colors and whites.
- Works great in cold or hot temperatures (**although 90°F warm water is recommended**).
- Easy to add directly to the wheel, or pumped by one of our state-of-the-art liquid injection systems.
- A **superior water saver** in linen plants—starch at lower water levels than those normally used with dry starches—**saving \$\$\$ and resources**.
- Will **lower BOD (biological oxygen depletion) levels**—important for the environment and may reduce sewer charges for volume operations.
- StarBright Liquid II can eliminate the use of sour in some linen operations.

“Dont trust the imitations!”
