

## Fabritec 5911 Titanium PLUS Detergent

### Products/Procedures

**Fabritec TITANIUM PLUS 5911** Shirt & Laundry Detergent is a highly effective detergent for shirt laundries and other applications. It's low alkalinity, low temperature water requirements and simplicity of use makes it economical and environmentally friendly.

A true one-shot formulation, **Fabritec TITANIUM PLUS** works with a synergy which is unique among common detergents. Specially blended nonionic and anionic surfactants coupled with new enzyme technology, a color safe activated oxygen bleach system (double common competitive detergents) containing low temperature activators produce spectacular whites and brilliant colors. Extra soil suspending agents and fluorescent brighteners enhance the product performance. Soil removal is excellent, requiring little or no pre-treatment of collars or cuffs. Soil and stain removal is superior even at low wash temperatures. The product retards the bleeding or crocking of some dyes. Low temperature wash and reduced rinsing saves water and energy. Elimination of all additional products except sour and starch results in simplicity and further savings. **Fabritec TITANIUM PLUS** is biodegradable and contains no phosphates.

The product is a fine white powder and is packaged in a 40 lb. pail. It is shipped freight prepaid with a three pail minimum or with a regular Fabritec order. Contact your Fabritec representative for additional information.
