

Fixing and levelling agent for direct dyes on textiles. As well as colour stabilisation and protection of redeposition in colour wash processes.

Characteristics

- COLOFIX prevents or reduces transfer of dyes during wash processes
- COLOFIX improves wet and colour fastness of direct dyes on natural fibres
- COLOFIX levels uneven dye applications or partial dye damage
- COLOFIX is suitable for use as a dye stabilising additive for washing processes for delicate items, carpets, and the after-treatment of silk materials or textile batik

Chemical-physical data

Appearance: clear, colourless liquid
Density: 1.07 g/ml
Viscosity: 100 mPas
pH value: 8
Flashpoint: above 100 °C (212° F)

Application

Prevent dyestuff transfers

To prevent dyestuff transfers in wash processes, 2 ml COLOFIX per kg (0.03ozfl of COLOFIX per lbs) goods should be added with the detergent.

Level uneven dyes

To level uneven dyes, 20 ml COLOFIX per kg (0.31ozfl of COLOFIX per lbs) textile goods should be used with a 1: 20 liquor ratio at 30 °C (86° F) in a 30min. wash stage, followed by a cold rinse.

Use and Storage

Containers should be tightly closed after dispensing. In unopened containers, COLOFIX can be stored for at least 12 months.
